## Microsoft Word Keyboard Shortcuts Worksheet

**Activity Overview:**
Everyone knows that fast and efficient typist rarely let their fingers leave the keyboard. Having to lift your hand to find the mouse, then point and click at an icon, only slows down typing speed. Becoming adept at using control key shortcuts will not only save time but will increase your knowledge of the power of your word processor.

**Directions:** Fill in the correct Shortcut to it corresponding function.

After a 25% discount on his price, he earned 25%. Analysis: The sentence, "50% off", refers to the rate. Find the discount rate that is given on a shirt whose sale price is $546 after having deducted a discount of $ 104 on its marked price. (SP) + (discount). The price of a sweater was crushed from $960 to $816 by a trader in the winter season. Discount is: 0.50 x $5.00 = $2.50 The sale price is calculated as follows: $5.00 original price - 2.50 - $2.50 discount sale price Answer: The discount is $2.50 and the sale price is $2.50. 15% 3. (15 Worksheets) If you are seeing this message, it means that we are having trouble loading external resources on our website. Find Price of Sale or Branded Price I associate the task of calculating the marked price and the sale price when the discount amount is given. Discount is: 0.20 x $12.00 = $2.40 Thesales is calculated as follows: $12.00 original price - 2.40 - discount $9.60 sale price answer: The discount is $2.40 $2.40The sale price is $ 9.60. Generally, a shop served an article of a percentage of the original price. The mathematical sheet on discounts help us practice questions about how to solve problems related to the price taked, at the sale price and discount on profits and losses. In a boutique, an $ 14 scarf is marked, "20% discount". What is the sales price of the scarf? Note that we calculated the sale price in the above problem, but we have not calculated the discount. Or you want to know more information about mathematics mathematics. Solution: â ¢ the rate is 20%. After granting a 10% discount on the marked price, a trader still earns by 17%. Find the marked price of the fan. Find his profit or loss for a hundred. 7. So the "10% discount" refers to the discount rate. Problem: in a video store, a DVD that sells for $ 15 is marked by the "10% discount". What is the discount? If you are behind a web filter, make sure that the domains *.kastatic.org and *.kasandbox.org are unlocked. Could you have done this problem using mathematics? Find, for example, the % discount when the marked price is $ 121 and the sale price is $ 110. Find the marked price of a dining table that costs the carpenter $ 1190. The phrases used for the items Discounted include "â ¢ off", "save 50%" and "get a 20%discount". Procedure: To calculate the discount, multiply the rate by the original price. With what percentage is the price marked above the cost price? Our working sheets for the percentage of free discounts and discount are an excellent starting point if you are eager to explore the topic of the discount soup in Nuts! Finding discounts discounts discounts are a relief in an otherwise hectic life! Find the discount amount by subtracting the price of ous ous li anges etnaicremmoc nU .ongosib iah iuc id ²Âic eravort rep elgooG us acrecir atseuq asU .bew resworb led eroirepus etrap al adraug onoforcim la ossecca'l eritnesnoC Â !! arutinIF .1 .etsopsiR .otnocs id otropmi nu eralorlac emoc erepas id ativ Àtilibaˈl odnedabir .otacram ozzerp lad 35% higher than the cost price and allows a 20% discount on the marked price. Sales tax worksheets do not allow students to falter to become financial genes! Use our specially curated printable worksheets and watch smart students grow from novices in expert sales tax calculators by deepening a sea of fascinating exercises and word problems. 8. 9. In a bike shop, a $500 bike is marked, "Get a 30% discount". What is the price of bicycle sales? How much television is available? 12. Calculate the amount of the discount/percentage discount. A dealer allows two successive discounts of 20% and 5%. $ 16450 10. What is the price of selling the DVD? How much percentage above the cost price should mark its assets so that after giving a 10% discount on the marked price, you earn 8%? Find the profit or loss percentage made by the trader. 3. 16% 4. To find the discount, multiply the rate for the original price. Directions: solve any problem below by entering an amount in dollars with cents. $3813. What's the price of selling cheese pizza? $1,800 9. The phrase, "50% discount", is the same as "1/2 discount". 4. $600 6. To calculate the sale price, remove the discount from the original price. Find the discount amount, the marked price or the sale price using the appropriate formula. Solution: the rate is 25%. A retailer bought a refrigerator for $ 11515. Below is a modified version of the problem from the top of this page. Discount Word Problems Second-average and 8th grade students are sure to know the value of their money. Analysis: shops often sell goods at a discounted price. Belowreport the answers for the worksheet on discounts to calculate the discounted price on the marked price. 2. Analysis: "The phrase" Saves 25%," refers to the rate. Procedure: The rate is generally given as a percentage. Now that we have a procedure, we can solve the problem above. 24% â— â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â âPercentage and percentage of loss of words of words on profits and loss of the calculation of profit or losspracctice test on profit and the loscountpracctice test on loss and profit discountâ— profit, loss and discount - working sheets sheets to find profits and i Work sheets of loss on Profit and loss percentage working sheet on Gain and loss percentageworksheet on discounts 7th Grade Math Problems8th Mathematics practice from the working sheet on home page discounts haven't you found what you were looking for? Solution: the rate is given as the fraction. Comparing discounts do not defeat, it doesn't matter where you are shopping! To resolve these printable workshops, process the sales prices of items in 2 stores, compare the discount in each shop, and find the best sale price. Problem: in a video store, a DVD that sells for $ 15 is marked, "10% off". 5. $ 14060 14. What is the discount for the iPod in operation 2? What is the sale price of the candy pot? So, the customer pays 90% for the DVD. To find the sale price, remove the discount from the original price. $ 235 5. Find the single discount which is equivalent to two subsequent discounts of 20% and 5%. Find its sale price. 2. Graduated in prolific discount scholars with our printable tools; Use the correct formula and validate the answers using the response key. To find discount rates in a jiffy, you need to know the application of the percentage inside and outside. Discount percentage how much discount is it enough? To start again, click Clear. The discount rate is usually given as a percentage, but it can also be given as a fraction. Find the marked price of the toy. 5. After clicking on Enter, a message appeared in the search box to indicate if the reply is correct or incorrect. Once again, it is possible discount and sale price using mental mathematics. Discount Thematic Worksheets This is discounts! What's more, it is in pdf discount theme worksheets! DiscountGrade 6, Grade 7 and Grade 8 grab each discount in circulation while increasing their percentage application capabilities. What's the discount? Find the discount rate he gave. 3. 11. Loss = 2% 8. Discount is: 0.10 x $15.00 = $ 1.50 The sale price is calculated as follows: $ 15,00 Original price -discount 1.50 -â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â â If you see a message asking for permission to access the microphone, allow. Example 1: In a large warehouse, a $40 dress is marked, "Save 25%". What's the discount? Solution: â the rate is 50%. The shopkeeper offers a discount off season of 18% on it. Solution: â the rate is 10%. 4. Our trouble words arise gently after each other, whenever it presents a new scenario and continues to find the missing prices. What is the price of sale of the dress? A mobile phone was marked at 40% above the cost price and a 30% discount was given on the marked price. Gain = 8% 7. Find the marked price of tea set. 6. Analysis: "The phrase" Get a 20% discount," refers to the rate. Selling price = Branded price â˜ 'Scount and Branded price = Sale price + Discount. What's the discount? Let's take a look at another example using a fraction. At $30 shirt is marked, "GetÂ off." What is the sale price of the shirt? A$46 dealer purchased a fan for $1080. The discount is: 0.25 x $40.00 = $10.00 The sale price is calculated as follows: $40.00 original price -Â Â 10.00 -Â discount Â Â Â $30.00 Â Â Â Â sale price Answer:Â The discount is $10.00 and the sale price is $30.00. A carpenter allows a 16% discount to its customers and still earns 20%. Example 3: Â In a candy shop, a candy candy jar from $ 5,00labeled, "50% discount." What's the discount? The original price of the dress is $40. When things are scandalously expensive, only a generous discount can help! Here, students of 6th grade and 7th degree subtract new price from the original price to obtain the price reduction. Let's look at another way of calculating the sale price on item 1. In Example 3, note that the discount rate is equal to 50%? After allowing a discount of 8% on a toy, it is sold for $ 216.20. Example 5:Â ÂIn a video store, a DVD that sells for $15 is marked, "10% off." What is the sale price of the DVD? Finding Missing Amounts | Complete the Table In this section of our printable discount worksheets, focus on finding the unknown price to complete the table. 13. $ 1700 11. So using mental math, you would get that one-half of $5.00 is $2.50. Summary:Â ÂStores often sell goods for a discounted price. 14. What is the sale price of the case of soda? For each exercise below, click once in the ANSWER BOX, type in your answer and then click ENTER. Close Happy discount day! Our pdf discount worksheets, awash with exercises involving discount, discount rate, marked price, and selling price, grandly open the discount store for students in grade 7, and grade 8. 20% 13. Typically, a store will discount an item by aÂ ÂpercentÂ Âof theÂ Âoriginal price. In an electronics store, a $75 iPod is labeled, "Save 15%." What is the sale price of the iPod? Let's take a look at some more examples of calculating discount and sale price. A tea set was bought for $ 528 after getting a discount of 12% on its marked price. Analysis:Â ÂThe phrase, "Â Âoff," refers to the rate. Example 2:Â ÂIn a grocery store, a $12 case of soda is labeled, "Get a 20% discount." What is the discount? It is expressed as a fraction. The sale price is: 0.90 x $15.00 = $13.50 Answer:Â ÂThe sale price is $13.50. Example 4:Â ÂA pizzeria has a coupon that reads, "GetÂ ÂÂ Âoff a $9.00 cheese pizza." What is the discount? discount?
