Prime Video is a streaming video service by Amazon. Prime Video benefits are included with an Amazon Prime membership. With your membership, you can watch hundreds of TV shows and movies on your favorite devices. To get started, visit [Amazon.com/primevideo](https://www.amazon.com/primevideo), or download the Prime Video app on your mobile device. There's an upcoming app found in the background of competing streaming sites. It's called Amazon Prime, the ones who brought Neil Gaiman's American Gods to TV. But they've done so much more than that and continue to do so, The platform is empowering its users to stay in control of their consumption. The biggest problem with cable TV is paying for access to over 50 channels and ending up watching up to 3 of them at most. Prime members can pick from a selection of channels that include HBO, Cinemax, Comedy Central Stand-Up, and more. Checking a show out before you purchase access to it will help you with making more informed decisions. Amazon will let you watch television show pilots for free under one condition. Ads will appear before and between the episode. Travel the world with Amazon Prime app. Among its large collection of movies are Bollywood favorites. Get a taste of India and its many regions through their cinema. Find titles like Baar Baar Dekho and the Dhoom series here. The app gives you an option to stream television shows and movies online or save it on your device for offline viewing. You can also opt for a short-term arrangement with Amazon's video rental. This feature is super helpful especially if you don't have a stable signal or internet connection. Learn new things every day. Discover facts you didn't know about the show you just watched through X-Ray. This is good for when you can't seem to place which movie you've seen a certain actor before. IMDb works with the app to provide biographical information about actors and their projects. Binge free of worries. The app won't let you get carried away and max your bandwidth cap. It has a data saving feature that will let you set how much data you want to spend that day. Where can you run this program? Watch different Amazon Prime tv shows and movies on any Android and iOS devices. You can also watch it on your desktop and Smart TV, too. Is there a better alternative? Netflix is a fierce competitor of this video streaming platform. They offer impressive originals like Stranger Things as well as Oscar-nominated films like Roma. However, their plans are pricier compared to Amazon's. You also get a lot of perks when you start using Amazon Prime. However, not all of its features can be used by people around the world. Features like video purchasing and rental only work for select countries. Should you download it? Yup. You can download the app and start binging on Amazon Prime movies. HighSpeed free shipping. Offers exclusive deals. Unlimited reading materials. Low rates. Reported bugs. Limited show collection. Music library does not have range as other streaming platforms. Amazon Prime Video is the official app of this Amazon service that lets you watch dozens of movies and TV series in streaming in a completely legal way. To be clear, Amazon Prime works quite similarly to Netflix and HBO Max. One of the strengths of Amazon Prime Video is that the app recalls exactly where you've left off watching an episode or a film, so you can resume from the same place whether you start watching again from the same device or a different computer or TV. What you find in the Amazon Prime Video catalog depends on where you're located. Users in some countries can access more content than others, but the most important thing is that practically all subscribers can enjoy the Amazon Originals and classic shows like Seinfeld. Amazon Prime Video is an essential app for users of this premium Amazon service. With it, you can enjoy great movies and shows anytime, anywhere. Reviewed by Juan Jesus Requires Android 4.1 or higher. Amazon Prime Video costs the same as your Amazon Prime subscription. This video on demand platform is included in your monthly or annual plan. So you don't have to pay extra to use it. You can watch The Lord of the Rings: The Rings of Power on Amazon Prime Video with the Android app. You can even cast it from your smartphone to your TV to enjoy the series on a bigger screen. Wondering why such an error has occurred and how to fix Amazon Prime video not working on Android phone? Well, this kind of issue generally occurs when you run the app. It can occur due to several reasons but believe me, it's really irritating. Nobody likes such types of interruption while watching some favorite videos on phone. So to help you out, I have come up with this article. In this post, we will dive into why Amazon Prime Video is not playing and also cover the best fixes for it. Reason Behind Amazon Prime Video Not Playing You might know about Amazon Prime Video is a free streaming service where users can watch several videos. This app can be used on any device like Android phone, Smart TV, iPhone, iPod, Apple TV, etc. It is a very popular app but some users have reported an error saying Amazon Prime not working on Android/TV while watching. According to users, the app crashes and the video disappears. Now, this kind of error can occur when there is a server failure, device failure, software failure, or even an improper network connection. There are several error codes noticed by users and going through them will help you to analyze the type of failure. Video or Playback Errors include 1007, 1022, 7003, 7005, 7031, 7135, 7202, 7203, 7204, 7206, 7207, 7230, 7235, 7250, 7251, 7301, 7303, 7305, 7306, 8020, 9003 Video or Application Unavailable Errors include 5505 or 1055 Payment and Order Errors like 2016, 2021, 2023, 2026, 2027, 2028, 2029, 2040, 2041, 2043, 2044, 2047, 2048, 7035 PIN Errors like 5014, 5016 Important: When you come across Amazon error code 1060 and all the TV shows and movies stop streaming then it's due to network failure. So, you should check and reconnect to your network again to make it working again. Fix Amazon Prime Video Not Working On Android Phone: Useful Solutions Now, it's time to walk through some of the best and effective ways to solve Amazon Prime not working on Android/TV. Method 1: Restart Your Devices The very first solution that I will suggest you to get rid of Amazon Prime video not working issue is by restarting the devices. Whether you are using an Android phone, TV, or PC, this process fixes any type of glitches that occur in the phone and refreshes the device without any problem. So before you move to any other solution, try to restart your devices. Method 2: Confirm Whether Amazon Prime Account Is Active Or Not When restarting does not work for you then you should check if the Amazon Prime video account is active or not. You must be aware that not all videos are free on Amazon Prime, so in this situation, you should check if the subscription has expired. Confirming your account is very important, no matter you have a monthly or annual subscription. Here are the steps to check the account status: First, go to the Account page on the app. Next, move to Prime Video Settings. Now, you can manage all your account details and subscription status from here. Also, make sure you are not using the same account on multiple devices. Amazon Prime allows using one account only on two devices. Method 3: Check Internet Connection Is Stable Another possible reason to make you suffer from such an error is a poor internet connection. When your internet connection will be good, obviously any app will work smoothly. Even you can restart your device once to make your internet work properly. Method 4: Make Sure Your App Is Updated To Latest Version You can come across Amazon Prime Video not working on Android error when the app is running on the old version. Many times, the old version of the app is not compatible with the device. In such a situation, you can experience the error message. Therefore, you should check if any update is available for the app. First, open Google Play Store > click on My Apps & Games You will see the list of apps installed on your phone. Find Amazon Prime and see if any Update option is available. Click on the UPDATE option and the app will run on the latest version. Now, you can open the Amazon Prime Video app and see if the error is resolved or not. Method 5: Use Amazon Prime Video On Different Phone When the app is not working on your phone, then you should check it on another device. Even you can open the app on your computer and check if the same problem is showing. If the app is working fine on another device then it must be a problem with the previous device. So you should once reboot your phone and again check Prime Video is showing content or not. Method 6: Clear App Data Of Amazon Prime Video When the app gathers lots of data then such kind of error is a common thing to come. Here, you have to clear app data to watch the latest videos on Amazon Prime Video. Android: Go to Settings > Apps/Application Manager > Prime Video on phone. Now click on "Clear Data and Clear Cache" > OK. After that, try to watch the videos again in the app to see the error is resolved. On TV: Go to Settings > Applications > Manage Installed Applications > Prime Video from your TV remote control. After that, tap on Force Stop > Clear data. Method 7: Reinstall Prime Video If you still face the same error then I will suggest you reinstall the app. The app sometimes becomes corrupt and does not work properly. In that case, you should uninstall the app first. After that, go to Google Play Store and search for Amazon Prime Video. Then click on the Install option and a new version of the app will be installed. Now, log in to the app and check if everything is working fine. Method 8: Stop Other Internet Activity While using the Prime video, if any other app is also in use then mobile data will affect the apps. In such a situation, you should pause other activities on your device and then start Amazon Prime Video. This will make the app work smoothly without any errors. Remember, the app does not properly with VPNs. So it's better to switch off all unwanted network tools to make sure your network connection will not slow. Method 9: Disable Do Not Track Setting If you are using Prime Video on your PC and if you have enabled Do Not Track settings on any browser then you cannot watch any videos on Amazon Prime. In that situation, you need to turn off Do Not Track option. Simply go to Chrome browser > tap on Menu > Settings > Privacy and Security > Cookies and other site data > switch off Do Not Track option. Method 10: Check If Server Is Down If you are still getting the same error of Amazon Prime Video not working Android then you should check if the server is down. Though other reasons are also there for not loading videos on Amazon Prime many times server issue occurs. In that case, you can check for the error by visiting the Down Detector website. This will tell you whether any kind of server issue is going through the app. After you open the site, click on the check Prime Video's status option. If the app site is down then you have to wait for some time unless it starts to work. Method 11: Check You Are Using Right HDMI Cable Another reason for Amazon Prime Video not working on Android is due to the HDMI cable. This happens in rare cases, when you watch video on the device via HDMI cable then the cable may contain some fault. When you watch HD content, remember that the HDMI cable should be at least HDCP 1.4 rating and for 4k video, it should be HDCP 2.2. Method 12: Advance Solution To Fix Amazon Prime Video Not Working Apart from all the above methods, if you are still looking for an advance and quick solution then go for Android Repair. This professional tool easily fixes Amazon Prime Video not working and other kinds of errors or issues on Android devices. It can resolve several errors like Instagram keeps crashing Android, Snapchat has stopped, WhatsApp not working on Android, YouTube stopped working, etc. The software does not require any technical skills to operate and easily solves the error and makes the device normally.
